# Life in Jungle

This man arrived to Amazonia, but he got lost from his group. He has to survive in this jungle, but to this moment Indians found him.

Indians considered him the Prophet. They gave him food and drink.

He learned the Indian language. He learned how to hunt and how to live in jungle. He eats what he gets in the jungle. There are plenty of bananas in the jungle. He lives in his house which he built. It rains a lot in the jungle, but the house stays dry. He roasts jungle rats on fire for dinner in the evening. He watches the stars before he goes to bed. It is a nice life in the jungle.

Our

Our base would be in the Slovakia - Vysoké Tatry at the lake České Pleso

Our work is going to be a singer/rapper. we're gonna make music clips on platform ~~youtube~~ and spotify.

In our free time we're gonna play musical instrument and we are going to go on little trips in the woods.

We are going to hunt the wildlife. And harvest the berries.

At the ~~beginning~~ beginning nobody funded us, neither friends, neither family but we showed 'em that we can face the nature. We can see our family once in the two months but friends can see us everyday 'cause they live near our base location. Its like 7 hours to our friends but 5 hours to our family.

We get our food from the shop in the village behind the mountains at Holé Pleso.
